

INTERACTIVE WAGERING SYSTEMS AND  
METHODS WITH PARIMUTUEL POOL FEATURES

Abstract of the Disclosure

- 5 The present invention provides systems and  
methods for determining projected effects of proposed  
wagers on parimutuel pools in interactive wagering  
systems. In order to assist a user in making a wager,  
the projected effects of a user's proposed wager on  
associated parimutuel pools are provided to the user.  
10 The projected effects that are provided include  
projected odds associated with the proposed wager,  
which are calculated based on both the user's proposed  
wager and associated parimutuel pool information.
